LOVE CRYPTO-FAMILIES? Solve our special collections, with over 300 delightful Crypto-Families in each! To order, see page 43.

Stars and Arrows

Start at the square marked "\$" and move through the diagram to the square marked "F." An arrow in a square indicates the direction you must take; a star allows you to move in any direction (horizontally or vertically, but not diagonally). No turns are allowed in the blank squares. You do not have to pass through all of the squares.

Solution on page 64

Scrambled Musical Terms

Match up each pair of letters in column A with pairs from columns B and C to form the names of 10 musical terms. Each letter pair will be used once. Do not switch the order of a pair of letters.

Solution on page 64

A	. В	C

WA	YT	VE	The second second

Keep on Moving

Your goal is to move from the highlighted square and return to that same square. The highlighted square has the number 2; therefore, you must move 2 squares north, south, east, west, or diagonally to another square. In the new square is a number; move that number of squares north, south, east, west, or diagonally. Continue moving in this way until you return to the highlighted square.

THREE'S COMPANY

This alphabetical list of seemingly unrelated words actually contains 15 groups of 3 related items. Your job is to sort them out into those 15 groups, using each item only once. The trick is that some of the items could be used in more than 1 list, but only 1 arrangement of the items will work. Remember, use each item only once and have exactly 3 items in each group.

This is a new target for those who can think in circles. The game works 2 ways, outward and inward. If you're outward bound, guess the word that fits clue 1-4 (the numbers correspond to the number of letters in the answer). Then go on to clue 5-9 and so on. If you're stuck with an outward-bound word, try the inward clues. Work both ways to hit the Bull's Eye.

SYL'LA-CROSTIC1.

Fill in the answers to the clues by using all the syllables in the Syllabox. The number of syllables to be used in each answer is shown in parentheses. The number of letters in each answer is indicated by the blank spaces. Each syllable will be used once. When the words are correctly filled in, their first and last letters, reading down, will reveal an epigram preceded by its author's name. Solution on page 66

"QUOTEFALLS"

The letters in each vertical column go into the squares directly below them, but not necessarily in the order they appear. A black square indicates the end of a word. When you have placed all the letters in their correct squares, you will be able to read a quotation across the diagram from left to right.

CODEWORD 1

Codeword is a special crossword puzzle in which conventional clues are omitted. Instead, answer words in the diagram are represented by numbers. Each number represents a different letter of the alphabet, and all of the letters of the alphabet are used. When you are sure of a letter, put it in the code key chart for easy reference. A group of letters has been inserted to start you off.

203 CRYPTOGRAMS 2003

Each of these cryptograms is a message in substitution code. THE SMART CAT might become MRX DGYUM LYM if M is substituted for T, R for H, X for E, etc. One way to break the code is to look for repeated letters. E, T, A, O, N, R, and I are the most often used letters. A single letter is usually A or I; OF, IS, and IT are common 2-letter words; try THE or AND for a 3-letter group. The code is different for each cryptogram.

DIAGRAMLESS 1

Diagramless crosswords are solved by using the clues and their numbers to fill in the answer words and the arrangement of black squares. Insert the number of each clue with the first letter of its answer, across and down. Fill in a black square at the end of

each word. Every black square must have a corresponding black square on the opposite side of the diagram to form a symmetrical pattern. Puzzles 1 and 2 have been started for you.

Start with the given word JINX and form a series of common 4-letter words by changing one letter at a time. Do not change the order of the letters. Your goal is to use as many different letters as possible. Cross off each letter of the alphabet as you use it (as we have done for you with the letters of JINX). Once a letter has been replaced, it may not be used again. Our expert used all the letters except Q and Y.

MIXMASTER

A quotation is concealed in this Mixmaster diagram. To reveal it, first write the 6-letter answers next to their clues. Next, locate the answers in the diagram and cross off their letters, crossing off 1 letter from each square Across or Down as indicated. The clues are not given in the order they appear in the diagram. The lettover letters (there will be 1 in each square) will spell out a phrase, reading left to right, line by line.

SCRAMBLE CROSS FILL-IN

Unscramble each group of letters in the diagram on the left to form a word and put it into the corresponding group of squares in the diagram on the right. Do this for ACROSS WORDS ONLY. The completed right diagram will be a crossword puzzle with words reading across and down. For groups of letters that can make more than one word across, solve across and down together.

Solution on page 64

Fill 'Er Up

insert the words in Column II into the spaces in Column I to form common words. Do not rearrange the order of the letters.

Discover the 5-letter Secret Words by the process of elimination and deduction. Fill in the blanks with the 5-letter answer words to the clues. The number in parentheses next to each answer word tells you how many of the letters in that word are also in the Secret Word. A 0 next to an answer word indicates that not 1 of the letters in that word is also in the Secret Word. After you have determined the correct 5 letters, rearrange them to form the Secret Word. No letter is repeated in any Secret Word or within any answer word. The first letters of the answer words, reading down, spell out a hint to the Secret Word.

Crostic Puzzle 1

Use the CLUES on the left to fill in the WORDS column. Then transfer each letter to the correspondingly numbered square in the diagram. (We have inserted WORD A as an example.) It is not necessary to know all the words to start solving. Work back and forth from the diagram to the WORDS column until both are filled. A black square indicates the end of a word. The completed diagram will contain a quotation, and the first letter of each word in the WORDS column, reading down, will spell the author's name and the source of the quotation.

BOWL GAME

To bowl a strike (20 points) you must create a 10-letter word using all the letters in each pin. The letter on top in the pin is the first letter of the strike word. To bowl a spare (10 points) use the same 10 letters to form two words. Splits are not allowed: you may not divide the strike to form a spare. For example, SWEETHEART may not become SWEET and HEART.

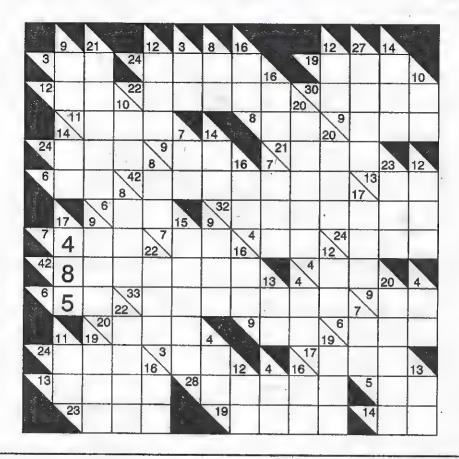

Our answers with a perfect score of 300 points on page 64

SUM TOTALS

Place 1 digit (1 to 9, no zeros) in each square so that the sum of the numbers in each group of squares across or down is the number given. The number below a diagonal is the sum of the numbers below it. The number to the right of a diagonal is the sum of the numbers to the right of it. IMPORTANT: No digit is used more than once in any group of squares leading to a sum. One group of digits has been given for you.

Solution on page 64

Strategy

Use any of the letters on the first line to form a word of 4 or more letters and write the word in the space on the right. Cross off the used letters and place all the letters not used in the boxes below them. If you cannot form a word, place all the letters in the boxes below them and continue. IMPORTANT: In any turn, if the box on the next line contains another letter or is blacked in, you have lost the letter. Score 4 points for a 4-letter word, 5 points for a 5-letter word, and so on. Deduct 5 points for each line without a word. Use all the letters in the diagram for a perfect score.

WORD QUEST

Ten common English words have been split apart and scattered through the diagram below. Your quest is to locate the correct first letter for each word and then follow the given course through the diagram to spell the answer. Each letter will be used only once. The first answer word is FRISKY. After trying other letters you find that if you start at the F in the 5th row (shown with a slash through it) and follow this route: 3W (3 letters to the west), 2N (2 letters to the north), 4W (4 letters to the west), 3S (3 letters to the south), and 6E (6 letters to the east), you spell out the answer.

LOGIC PROBLEM

THAT'S ASTOUNDING!

That's Astounding! offers an amazing variety of items at very low prices. In addition, the store features a different special bargain each weekday. Carl, Ida, and three other shoppers each went to That's Astounding! on a different day last week. Each intended to buy a different single item (one was a cookbook), but couldn't resist also taking advantage of the special bargain featured that day. From the information provided, can you determine the item each shopper went to the store to purchase, the bargain item each bought (one bought six rather lopsided candles), and the day each went shopping?

- 1. David went to the store to buy a basket.
- The person who went shopping on Monday for a planter, who was not Abby, also ended up with six digital alarm clocks.
- 3. The man who needed only one flashlight battery also ended up buying a dozen solar calculators. Two days earlier, Jane had arrived home with two cases of discounted champagne that had not been on her shopping list.
- 4. The bargain offered on Friday consisted of 20 pairs of assorted bamboo chopsticks.
- 5. The Wednesday shopper had intended to purchase only a ballpoint pen.

This chart is to help you record information from the clues as well as the facts you deduce by combining information from different clues. We suggest you use an "X" for a "no" and a " • " for a "yes."

LOGIC LOVERS! Choose from over 30 (yes, 30!) collections of your favorite Logic Problems. To order, see page 43.

OREBOARDSCOREBOARDSCOREBO!

TO PLAY:

- Enter the first seven LETTERBOX letters onto the first DRAWLINE and cross them off in the LET-TERBOX.
- Form a word of at least two letters across or down on the GAMEBOARD. One letter of the first word must go into the starred square.
- 3. Tally your score in the SCORE column.
- 4. Carry down all unused letters onto the next DRAWLINE. Transfer enough letters from the LETTERBOX, in the given order, so that you have seven letters to work with.
- 5. Build a new word or words by:
 - a. Adding one or more letters before and/or after words on the GAMEBOARD.
 - b. Adding one or more letters at right angles to words on the GAMEBOARD.
 - c. Adding a word parallel to one on the GAME-BOARD.

IMPORTANT: All adjoining letters must spell out complete words.

- Continue working this way until all the letters from the LETTERBOX have been used.
- Asterisks (*) are "wild" letters and may represent any letter you choose, but once used they cannot be changed.

NOTE: Proper names, foreign words, and abbreviations are not allowed. No word may appear twice on the GAMEBOARD.

TO SCORE:

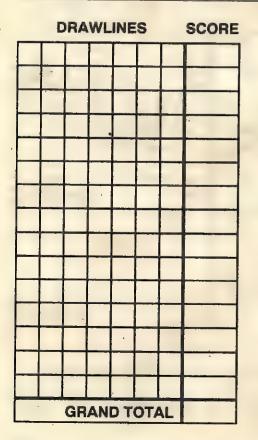

Score every letter in each new word as follows:

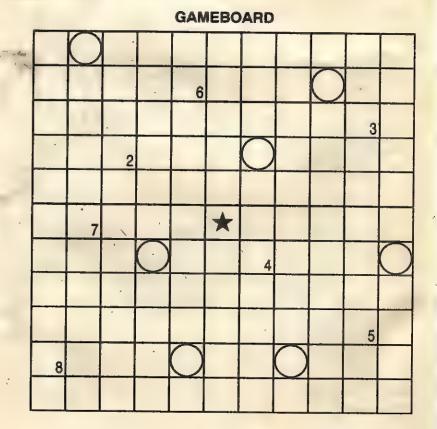

- 1. Letters in unnumbered squares count 1 point.
- 2. Letters in numbered squares count the given value of the square.
- 3. Double the score of a word containing a circle.
- 4. Triple the score of a word containing two circles.
- 5. Add 20 points if all seven letters from a DRAW-LINE are used in one play.

Can you beat our game of 403 points, given on page 63?

everything.

Real Dogs name themselves. If you are patient and your dog is in the mood, he may tell you what his name is. Failing that you will have to name him. Real Dogs are not named after celebrities, comic strips, sports cars, signs of the zodiac, flowers, or relatives.

3. Author: P(amela) Frankau Source: A Wreath for the Enemy I could not love this garden. Always it seemed to me artificial, spiky with color, not quite true. My idea of a garden was a green lawn and a little apple orchard behind a gray stone house. I saw this garden only once a year in September.

4. Author: (Sam) Levenson Source: Everything But Money Too many people end up earning a living, very often an excellent one, at work they do not love. Ideally, a man should have only one regret about his work-that it ends. He should hate death primarily because it leaves his work unfinished

5. Author: (W.M.) Praed Source: (A) Song of Impossibilities When German poets cease to dream, Americans to guess; When Freedom sheds her holy beam On Negroes, and the Press; When there is any fear of Rome, Or any hope of Spain; When Ireland is a happy home,

I may be yours again!

6. Author: (John) Hersey Source: Under the Eye of the Storm

Tomorrow will be a time when the earth will be a single farm, the moon will be colonized, the sea will be potable, the sun will be our power plant, intelligent life in the galaxies will be reachable by radio phone, and man in this world will be totally free.
